Management
Systems.**

Simplicity. Versatility. Durability.

ACCENT
MANUFACTURING INC.

Designed for Simplicity. Engineered for Durability.

MANURE MANAGEMENT SYSTEMS

Accent stainless steel manure handling products provide livestock operators with reliable solutions for their nutrient management requirements. Accent systems are designed to be a solution for a wide range of applications, farm sizes and manure types. The Accent IFRS 36 system is designed to work by itself, or be integrated into a larger manure management system for a versatile and economical solution.

Accent systems are designed by engineers to incorporate three important qualities farmers need to save them time and money. **Simplicity.** We've designed our equipment to be functional and uncomplicated, requiring minimal maintenance for the life of the product. **Versatility.** No matter what type of manure management method used, an Accent system is the solution. Numerous built-in features make them ideal for any application, regardless of the bedding used or manure composition. **Durability.** Our systems are built with superior material and exacting manufacturing practices guaranteeing you get the longest lasting manure management equipment available.

CHOOSE ACCENT QUALITY

ACCENT MANUFACTURING INC.

A division of Accent Stainless Steel Manufacturing Inc. worldwide specialists in the design, manufacture and installation of turn-key processing equipment for the agricultural, food, beverage and chemical industries.

Simplicity. Versatility. Durability.

PRODUCT LINE

IFRS 36 SEPARATOR

All stainless steel construction and the self cleaning rotary screen, make this the most economical and longest lasting manure separator available. High flow capacities, excellent solid capture rates, low maintenance requirements and the ability to handle any slurry content – including sand – make it ideal for every application. It's the preferred choice among discerning farmers worldwide.

RP 36 ROLLER PRESS

This powerful 3 HP high torque stainless steel roller press produces dry solids that can be stock piled for field application or for future uses such as bedding or compost. The robust construction and positive acting drive system ensures consistent and reliable performance.

MP SERIES PUMPS

Corrosion free and wear resistant these all stainless steel manure pumps will provide uninterrupted service for years. Cast volute cases and precisely machined rotating components significantly improve flow characteristics lowering horsepower requirements and operating costs.

TFSS 60 SAND TRAP

Sand laden manure is no longer a problem when you use the Accent Sand Trap. Combined with the IFRS 36 Separator, this stainless steel cyclonic system automatically captures, removes and stockpiles sand discharged from the IFRS 36 separator effluent stream.

ACCENT MANURE SEPARATOR

Every dairy producer operates their manure management systems differently. That's why Accent designed its IFRS separator system with versatility in mind. Engineered to adapt to any situation and withstand any condition, an Accent separator is the reliable choice for large or small manure management systems.

STAINLESS STEEL CONSTRUCTION

Farmers know the benefits of stainless steel. It's been proven to wear better and last longer than painted materials. That's why Accent uses full stainless steel construction for all its farm equipment. Built with pride by skilled craftsmen, an Accent stainless steel manure separator is the durable choice for dairymen who need equipment that will keep their operation running smoothly and consistently.

GO AHEAD. GET SAND.

Accent's rotary screen system was designed to separate sand laden manure with ease. And, its all stainless steel construction makes it durable enough to keep going for the long haul. Accent separators provide an ideal solution for dairymen who want to use sand but don't want all the hassles associated with it.
